

Evaluation

This is an assessment/test of the finished article to see if it fulfils the requirements of the brief, that is does what it was intended to so and perhaps suggest areas that it could be improved upon

Write a paragraph under each of the following headings or, answer the questions at the end of this document

- Fitness for purpose
- Appearance
- Use of materials
- Modifications
- Time management
- Safety and stability

Does the final project satisfy the design brief and fulfil all the requirements of the problem analysis?

Are you happy with the project? If so why? (3 points) If not, why?

If you were to do the project again what would you do differently?

Describe any difficulties you encountered. What you could improve?

What have you learned from producing the project?

Forget about the feel good factor i.e. I'm happy it is done and I hope you like it etc.

Don't mention things like; I would plan it better, I would start earlier this will probably be obvious from your finished project and folio.

Evaluation

1. Does it work well / Does it meet the brief?
2. Were the materials you chose the most appropriate, and say why?
3. If you were to do this project again what might you have done differently?
4. Did you manage your time well, did everything go according to plan or were you delayed at some stage and state why.
5. What advice would you give to someone making this project?
